# LEMON

## INTERDONATO

Interdonato, one of the earliest lemon crop varieties, grows most widely in the Eastern Mediterranean Region of Turkey. Turkey is the top Interdonato lemon producer in the world. The fruit is large and has an elongated and cylindrical shape. The most distinctive characteristic of the fruit is the leaning of its tip to one side. The rind is smooth, regularly shaped, light green and shiny. The greenish to yellow flesh contains few seeds. Due to being an early variety it is not suitable for storage.

# LEMON

LAMA

The Lamas variety is very selective with regard to the environment and thus its cultivation is restricted to an area between Erdemli and Silifke in the West of Provincial Mersin in the Mediterranean Region of Turkey. The medium size fruit body is of cylindrical shape and a round protrusion with a pointed tip identifies the fruit. The rind of the juicy fruit with distinctive taste and aroma is smooth, shiny and yellow. Lamas variety can be stored under suitable conditions for periods as long as nine months.
